A **refraction** is the process of determining the eye's refractive error for an eyeglass prescription. It is an essential part of an eye examination, but it is **NOT** a covered service by Medicare or most insurances. Our office fee for a refraction is \$50.00 and this fee is collected in addition to any copayment at the time of service.

Acknowledgment

I have read the above information and understand that the **refraction** is a **non-covered service** by **Medicare** and/or my insurance. I accept full financial responsibility for the cost of this service. The copayment is separate from and not included in the refraction fee.
